Rochester-based activities and developments

As one of the largest engineering firms in Rochester and one of the top 500 in the country, Erdman Anthony provides infrastructure engineering and support services to government and private-industry clients throughout the eastern United States. Its core businesses include transportation engineering, facilities engineering and design, civil engineering, geospatial services, and construction services.

What makes the firm a standout is its dual commitment to quality and innovation - innovation that leads to improved engineering solutions, enhanced productivity, or cost reduction for its clients. Early adoption of modern design technologies, such as building information modeling (BIM), keep Erdman Anthony well positioned to assist its clients with a multitude of infrastructure engineering projects.

Being quality-driven, focused on effective client communications, and dedicated to meeting schedules and budgets has led Erdman Anthony to be regularly honored by its clients and professional engineering organizations nationwide. The firm earned 10 awards in 2007 and 14 just in the first half of 2008.

*Frederick Douglass - Susan B. Anthony Memorial Bridge,
winner of more than a dozen local and national awards*

In its 54-year history, Erdman Anthony has been given the opportunity to shape and contribute to a number of significant Rochester-area projects including the Monroe Public Safety Building, Frederick Douglass-Susan B. Anthony Memorial Bridge, Chase Tower, Main Street Redevelopment, and various projects at Eastman Kodak Company and Wegmans. The Frederick Douglass-Susan B. Anthony Memorial Bridge, which spans the Rochester skyline, has received numerous awards for its design and construction. Other recent award-winning projects include reconstruction of one of the city's arteries – Elmwood Avenue and the Irondequoit Lakeside Multi-Use Trail.

Erdman Anthony's commitment to quality and innovation extends to its employees, nearly half of whom are based in Rochester. More than 35% of the firm's staff members are graduate engineers and planners and more than 60% are professionally licensed.

In addition to bringing years of experience and training from some of the most prestigious engineering colleges in the nation, Erdman Anthony's employees also own the firm. This employee ownership leads to an unparalleled level of dedication to client satisfaction and quality of work.

Erdman Anthony is headquartered in Rochester and operates five other offices in Albany; Buffalo; Poughkeepsie; Harrisburg, PA; and West Palm Beach, FL.
